After a year of strong advancements, Prodways announces the signing of 2 new partnership agreements

2015 was a year of significant progress in proposing a complete additive manufacturing offer, including the acquisition of Initial, a French service bureau; the launch of a new laser sintering range of materials, printers and services; and the creation of a new aerospace division. Prodways, subsidiary of Groupe Gorgé, is now proud to announce the signing of 2 new partnership agreements.

In France, Prodways announces the signing of a sales partnership with the company Document Store who, based on their strong 15-year experience, has decided to commit in the new revolution of 3D printing with Prodways.

Another sales partnership had also been signed with the company Metris 3D in Hungary. Metris 3D is a well-established company, in business for more than 10 years, which is composed of additive manufacturing experts who are well-known for both their experience in sales and technical expertise.

Miki Thurzo, Executive Director of Metris 3D, provided the following quote: “METRIS 3D is happy to partner Prodways in high-tech 3D printing market. We will be proud to be a part of this success story by introducing this extreme level of engineering technology to the market. We believe the exciting product range from Prodways will complement both our own business portfolio and the general additive manufacturing industry very well.”

Those announcements are strengthening the sales expansion of Prodways and affirm its ambition to become a key reference in 3D printing in 2016.
About Prodways

Prodways, a subsidiary of Groupe Gorgé, assists major industrial firms with innovations and production processes by providing high-end solutions for additive manufacturing. Prodways’ strategic positioning is to combine the necessary technological solutions with the capacity to provide services and support necessary to help companies develop and meet industrial challenges by:

- providing a top-quality, state-of-the-art industrial solution
- providing a complete range of technologies to meet their needs in terms of productivity and reliability
- developing materials suited to industrial constraints (mechanical properties, biocompatibility, flammability, etc.)
- proposing product design and engineering and consulting on production technologies and processes
- qualifying business processes beforehand by creating test parts and process simulations
- proposing manufacturing solutions for back-up and peak reduction
- investing in innovative players in the 3D ecosystem.

Prodways is now one of the few players able to overcome all industrial challenges and boost the emergence of additive manufacturing in series production. Prodways’ offer is backed up by additional activities that enable it to position itself as a serious rival to the two global market leaders and also to become the only company outside the USA to offer clients a wide range of 3D printing technologies and a complete range of 3D printing services.

Disclaimer

This press release could contain statements on past events and forward-looking statements including statements regarding future goals or targets. Forward-looking statements reflect current expectations for results and future events. Such forward-looking statements and targets depend on known and unknown risks, uncertainties and other factors that may cause actual results, performance or events to differ materially from those anticipated herein. All these risks and uncertainties
could affect the Group's future ability to achieve its targets. Risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements and targets include, among other things: the risks and uncertainties possibly mentioned in this press release; the strength of competition; the growth of the market; currency fluctuations; interest rate fluctuations; raw materials and freight price fluctuations; armed conflicts or political instability; control of costs and expenses; changes in tax legislation, rules, regulation or enforcement; our ability to successfully keep pace with technology changes; our ability to attract and retain qualified personnel and key-men; the evolution, interpretation and uniform application and enforcement of International Financial Reporting Standards (IFRS), according to which we prepare our financial statements; supply chain bottlenecks; the performance of our business partners (subcontractors, agents, suppliers, etc.). Some of these risk factors are set forth and detailed in our Document de Référence (Registration Document including the annual financial report filed with the French Autorité des Marchés Financiers). This list of risks, uncertainties and other factors is not limitative. Other non-anticipated, unknown or unforeseeable factors could also have material adverse effect on our targets. The Group expressly disclaims any obligation or undertaking to update or revise any forward-looking statements or targets potentially contained in this press release to reflect any change in events, conditions, assumptions or circumstances on which any such statements are based.
