Ticker Code: GGRGY / GGRGF

## Prodways announces its first success in the jewelry market

Prodways announces the sale of a D 35 machine for a new jewelry application. Using the lost wax foundry process, this foreign customer will print several thousands of jewelry models (rings, pendants, etc.) on a daily basis.

The productivity of Prodways machines won over this customer, which had already used competitor machines. Each product batch is printed in a few hours, bringing production per unit time for a pendant of 2.5 cm to under 11 seconds, for example. To Prodways' knowledge, this level of productivity is unique on the market.

This printing speed demonstrates the productivity of Prodways machines but also the performance of the software developed enabling to process extremely large 3D data files (several tens of Gigabytes).

###

About Prodways

Prodways, subsidiary of Groupe Gorgé, assists major industrial firms with innovations and production processes by providing systems, 3D printers and premium materials for additive manufacturing. With MOVINGLight® technology, Prodways offers solutions which provide parts of unsurpassed quality and significant savings in the production of objects for a wide range of industrial and biomedical applications.
