

### About Groupe Gorgé

Established in 1990, Group Gorgé is an industrial group operating in different areas of expertise:

**Smart Safety Systems** — Using technology to work in risk environments;

**Protection in Nuclear Environments** — Protecting people and securing buildings operating with radioactive materials;

**Industrial Projects & Services**  
Conducting Robotics and Fire protection systems projects for industry and service-sector player;

**3D Printing** — Enabling major industry players to find new routes to successful innovation and production processes by providing systems, 3D printers and new premium material.

In 2015, the Group reported revenue of €264.8 million. It is backed by 1,536 employees and operations in over ten countries.

## Prodways extends its market coverage to South Africa with new partner CAD House.

At the edge of Electra Mining Africa, the largest mining, industrial, electrical and power trade show taking place in Joannesburg September 12-16, Prodways, subsidiary of Groupe Gorgé, extends its market coverage to South Africa by signing a new partnership deal with CAD House.

Founded in 2010 by Bernhard Vogt, who has more than 20 years' experience in automotive and aerospace design, CAD House has grown from a small home-based business to a strong, established company offering turnkey solutions, with a full complement of sales, technical and services staff in South Africa. CAD House has successfully delivered thousands of 3D printers, ranging from a variety of desktop models to professional 3D Printers and industrial solutions. Furthermore, the CAD House product offering has expanded to include leading 3D scanning technologies and state-of-the art 3D design, inspection, and reverse engineering applications.

CAD House's Center for Advanced Rapid Production features the latest premium laser sintering technologies and is capable of manufacturing on-demand, tooling-free end-use parts that look, feel and function like any traditionally manufactured component.

Prodways and CAD House announced that they have entered a partnership to introduce the complete range of Prodways 3D printing solutions in the Southern African market, from exclusive MOVINGLight® technology — providing a unique combination of high resolution and fast throughput — to its latest laser sintering range, which delivers state-of-the-art industrial production capabilities with high precision and accuracy.

Prodways – Cindy MANNEVY – Marketing & Communication Manager – Tél. : +33 (0)1 30 90 44 12 – E-mail : [c.mannevy@prodways.com](mailto:c.mannevy@prodways.com)

Groupe Gorgé – Nathalie LAGOS – Communication Manager – Tél : +33(0)1 44 77 94 86 – E-mail : [n.lagos@groupe-gorge.com](mailto:n.lagos@groupe-gorge.com)

This new partnership with CAD House will enable Prodways to strengthen its worldwide sales and distribution network, offering customers operating in South Africa a complete range of 3D printing solutions. It also underpins Prodways' drive to become a key player in the global 3D printing sector, throughout the entire value chain, incorporating the development of cutting edge technology, the supply of high quality materials, and the provision of engineering and manufacturing services for parts production.

###

#### About Prodways

Prodways, a subsidiary of Groupe Gorgé, assists major industrial firms with innovations and production processes by providing high-end solutions for additive manufacturing. Prodways' strategic positioning is to combine the necessary technological solutions with the capacity to provide services and support necessary to help companies develop and meet industrial challenges by:

- providing a top-quality, state-of-the art industrial solution
- providing a complete range of technologies to meet their needs in terms of productivity and reliability
- developing materials suited to industrial constraints (mechanical properties, biocompatibility, flammability etc.)
- proposing product design and engineering and consulting on production technologies and processes
- qualifying business processes beforehand by creating test parts and process simulations
- proposing manufacturing solutions for back-up and peak reduction
- investing in innovative players in the 3D ecosystem.

Prodways is now one of the few players able to overcome all industrial challenges and boost the emergence of additive manufacturing in series production. Prodways' offer is backed up by additional activities that enable it to position itself as a serious rival to the two global market leaders and also become the only company outside the USA to offer clients a wide range of 3D printing technologies and a complete range of 3D printing services.

*Disclaimer*

*This press release could contain statements on past events and forward-looking statements including statements regarding future goals or targets. Forward-looking statements reflect current expectations for results and future events.*

*Such forward-looking statements and targets depend on known and unknown risks, uncertainties and other factors that may cause actual results, performance or events to differ materially from those anticipated herein. All these risks and uncertainties could affect the Group's future ability to achieve its targets. Risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements and targets include, among other things: the risks and uncertainties possibly mentioned in this press release; the strength of competition; the growth of the market; currency fluctuations; interest rate fluctuations; raw materials and freight price fluctuations; armed conflicts or political instability; control of costs and expenses; changes in tax legislation, rules, regulation or enforcement; our ability to successfully keep pace with technology changes; our ability to attract and retain qualified personnel and key-men; the evolution, interpretation and uniform application and enforcement of International Financial Reporting Standards (IFRS), according to which we prepare our financial statements; supply chain bottlenecks; the performance of our business partners (subcontractors, agents, suppliers, etc.).*

*Some of these risk factors are set forth and detailed in our Document de Référence (Registration Document including the annual financial report filed with the French Autorité des Marchés Financiers). This list of risks, uncertainties and other factors is not limitative. Other non-anticipated, unknown or unforeseeable factors could also have material adverse effect on our targets. The Group expressly disclaims any obligation or undertaking to update or revise any forward-looking statements or targets potentially contained in this press release to reflect any change in events, conditions, assumptions or circumstances on which any such statements are based.*
