

Inovsys sas chooses the ProMaker P1000 3D printer from Prodways Technologies to equip its rapid manufacturing platform in the Henri-Fabre Technocenter.

Paris 10th October 2017

Prodways Technologies and Inovsys announce the installation of the new ProMaker P1000 3D selective laser sintering printer in the Henri-Fabre Technocenter in order to support the development of mass production solutions for future industry.

In the context of this purchase, Inovsys in particular takes on the latest 3D printing technology in terms of qualification and integration of additive manufacturing in industry.

Thanks to its open platform, the new ProMaker P1000 3D printer from Prodways allows research centers to develop their own materials and innovating applications for mass production.

Inovsys is working with the Prodways Promaker P1000 3D printer on three main subjects:

- 3D printing cost optimization for mass production by working on material optimization, its impact on the environment and its refreshing rate, in particular,
- The inclusion of 3D printing technology in a complete and certified process, in particular by working on robotization and the development of post-process peripherals to ease its inclusion in industrial production,
- The development of calculation code to predict the deformation of a part before manufacturing it.

● About TEAM Henri Fabre

TEAM Henri-Fabre is an association grouping together industrials for the purpose of developing industry of the future in the Provence-Alpes-Côte d'Azur region of France at the long term service of businesses and the territories.

Supported by all the public partners (State, Region, Département, Metropole, CCIMP), the Henri-Fabre project is based on a collaborative approach between multi-sector industrial (aviation, energy, naval, medical, transport, etc.), academic and institutional players whose purpose is to develop a world class reference eco-system around the key expertise that is mechanics, materials and future techniques, as well as around digital engineering. The Henri-Fabre Technocenter, located in Marignane, is a place where expertise is shared between major industry, SMEs, Startups, academics and research.

Bolstered by its partnership with Inovsys, TEAM Henri-Fabre allows SMEs to get access to R&D resources and leading edge equipment, including 3D printing, ramping up and business diversification, collaborative projects, the development of an employment-training program, etc. to be ready for the industry of the future together.

● About INOVSYS

Based in the Provence region of France and founded in 2015, Inovsys is a French innovation-oriented business. The company was the result of an alliance between major investors (major corporations, innovating SMEs, major laboratories, the French State) in the context of a request for projects known as Investissement d'Avenir (Investment in the future). The evolutive investor alliance allows Inovsys to propose a service offer (training and support) on good terms with the existing institutes, industrials and service providers.

In terms of 3D printing, Inovsys proposes a training offer based on the requirements of industrials who wish to assess or integrate a 3D printing machine. In addition, the company offers customized support to all industrials who want to secure their startup times and time to production.

● About PRODWAYS TECHNOLOGIES

PRODWAYS TECHNOLOGIES is one of Europe's leading manufacturers of industrial 3D printers, offering a broad spectrum of multi-technology 3D printing systems and related premium materials. The company focuses on developing rapid manufacturing applications as well as supporting innovation with an open material strategy. PRODWAYS TECHNOLOGIES caters to a large number of different industries, including health, aerospace, and automotive, providing innovative companies the means to shift to 3D printing-based production.

PRODWAYS TECHNOLOGIES is a subsidiary of PRODWAYS GROUP. In 2016, the group generated revenue of €25.2 million, including 58% outside of France.
